Almost everything looks great, except the web link to How Lead Gets Into Drinking Water. That link takes you to lead in air, not drinking water. The proper link is: <https://www.epa.gov/ground-water-and-drinking-water/basic-information-about-lead-drinking-water>

We can fill in the FAQs later. Please take a look and let me know if there's anything needs changing on the characterization of the sample results.

The page about the pilot
